Bangalore, Karnataka, India

Professional Summary

Results-driven Junior Software Engineer with hands-on experience in Java, Python, Azure Cloud, and DevOps. Trained in Agile and Scrum methodologies with a strong foundation in full-stack development, machine learning, and database management. Passionate about leveraging cloud technologies to build scalable, innovative software solutions.

Experience

TietoEVRY (Tieto India Pvt. Ltd.)

Junior Software Engineer

April 2025

Bangalore, India

- Completed an intensive 1-month onboarding program covering software development life cycle, Agile methodology, and modern web technologies.
- Engaged in a Scrum methodology workshop, gaining practical knowledge of sprint planning, backlog management, and iterative delivery.
- Completed a comprehensive 5-month technical training program encompassing Linux administration, Networking fundamentals, Azure DevOps pipelines, and Azure Cloud services.
- Recognized with a certificate of appreciation for valuable contributions to the Digital Human project, presented at Tech Utsav 2025.

Projects

Heart Disease Prediction System | Python, Django, Machine Learning, PIP3

6 Months

- Designed and implemented a machine learning-based web application to predict harmful heart conditions using supervised classification algorithms, achieving measurable accuracy improvements across multiple ML models.

Hospital Management System | Advanced Java, JSP, MySQL Workbench, Tomcat Server

3 Months

- Developed a full-featured hospital management web application integrating JSP front-end with MySQL back-end, streamlining administrative workflows and improving operational efficiency for healthcare stakeholders.

Curfew E-Pass Management System | HTML, CSS, PHP, MySQL

3 Months

- Built a role-based web platform (admin, sub-admin, applicant) to automate e-pass application, approval, and issuance during curfews, replacing manual processes with a faster digital workflow.

Linked List Visualization | C, C++, OpenGL

15 Days

- Implemented an interactive graphical demonstration of linked list insertion and deletion operations using OpenGL, providing a clear visual understanding of data structure manipulation.

Skills

Languages: Java, Python, C, C++, JavaScript, HTML, CSS, PHP

Cloud & DevOps: Microsoft Azure, Azure DevOps, Azure Database, Linux Administration, Basic Networking

Databases: SQL, MySQL, MySQL Workbench, Azure Database

Tools & IDEs: Git, GitHub, Android Studio, Eclipse, Visual Studio Code, Microsoft Azure Portal, Matplotlib

Frameworks: Django, JSP, Advanced Java (Tomcat Server)

Methodologies: Agile, Scrum

Languages Spoken: English, Kannada, Hindi

Certifications

- Java Full Stack Development – QSpider
- Programming Using Java – Infosys Springboard
- Python Foundation Certification – Infosys Springboard
- Scrum Fundamentals – SCRUM Study
- AI Foundational Training Program
- Microsoft Azure Certification Course – IntelliPaat

Education

Alvas Institute of Engineering and Technology, Moodabidri

Bachelor of Engineering – Computer Science & Engineering | CGPA: 8.76/10

Graduated 2024

Moodabidri, Karnataka

Jawahar Navodaya Vidyalaya, Haveri (CBSE)

Pre-University (PCMBs): 82% | Secondary School (SSC): CGPA 8.8/10
